

# SO MANY NURSES!

Did you know there's more than one type of nurse? **Download, print, cut out** the badges, and **attach** them to the nurse they represent to learn about all kinds of nurses in the medical community.

**Don't forget to ask a grownup to help cut out the badges!**

## Certificate in Nursing Assistant (CNA)

What does a CNA do? Certificate in Nursing Assistants or CNAs monitor vital signs and medication and assist in daily routines like bathing and dressing patients and repositioning and walking.

## Licensed Vocational Nurse (LVN)

What does an LVN do? Licensed Vocational Nurses or LVNs monitor blood pressure, change bandages, collect samples, and address patient concerns to RNs and doctors.

## Registered Nurse (RN)

What does an RN do? Registered Nurses or RNs check patients, give medications and treatments, assist in diagnostic testing, and provide health education to patients and their families.
